

1. Performance Analysis Chart:

S.No	Parameter	Expected Value	Observed Value	Status
1	Cooling Time	5–7 mins	6 mins	Pass 
2	Heating Time	4–6 mins	5 mins	Pass 
3	Temperature Accuracy	±2°C	±1.5°C	Pass 
4	Power Consumption	< 10W	8W	Pass 
5	App Response Time	< 2 sec	1.5 sec	Pass 
6	Connectivity Range	10–15 meters	12 meters	Pass 

2. Test Case Table:

Test Case Chart

Test ID	Test Scenario	Input Condition	Expected Output	Actual Output	Result
TC01	Turn ON device	Power supply ON	Device starts	Device started	Pass
TC02	Cooling mode	Temp set to low	Water cools	Cooling observed	Pass
TC03	Heating mode	Temp set high	Water heats	Heating observed	Pass
TC04	App connectivity	Connect via Bluetooth	Device connected	Connected successfully	Pass
TC05	Temperature display	Sensor active	Correct temp shown	Accurate reading	Pass
TC06	Auto cut-off	Temp reached	System stops	Working properly	Pass

3.Bar Chart
